The Human Journey-Kevin Reilly 2012-11-10 The Human Journey offers a truly concise yet satisfyingly full history of the world from ancient times to the present. The book’s scope, as the title implies, is the whole story of humanity, in planetary context. Its themes include not only the great questions of the humanities—nature versus nurture, the history and meaning of human variation, the sources of wealth and causes of revolution—but also the major transformations in human history: agriculture, cities, iron, writing, universal religions, global trade, industrialization, popular government, justice, and equality. In each conceptually rich chapter, leading historian Kevin Reilly concentrates on a single important period and theme, sustaining a focused narrative and analytical perspective. Chapter 2, for example, discusses the significance of bronze-age urbanization and the advent of the iron age. Chapter 3 examines the meaning and significance of the age of classical civilizations. Chapter 4 explains the spread of universal religions and new technologies in the postclassical age of Eurasian integration. But these examples also reveal a range of approaches to world history. The first chapter is as example of current “Big History,” the second of history as technological transformations, the third of comparative history, the fourth the history of connections that dominates, and thus narrow, so many texts. Free of either a confined, limiting focus or a mandatory laundry list of topics, this book begins with our most important questions and searches all of our past for answers. Well-grounded in the latest scholarship, this is not a fill-in-the-blanks test, but world history in a grand humanistic tradition.

U.S. History-P. Scott Corbett 2017-12-19 Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class, and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experiences).

Introduction to Human Geography-David Dorrell 2018-10
Geography-Acrid Holt-Jensen 2009-09-24 Now in a fourth edition, this standard student reference has been totally revised and updated. It remains the definitive introduction to the history, philosophy, and methodology of human geography; now including a detailed explanation of key ideas in human geography’s post-modernist and post-structuralist ‘turns’. The book is organized into six sections: What is Geography?; an introduction to the discipline, and a discussion of its organization and basic research approaches, informed by the question ‘what difference does it make to think geographically?’; Foundations of Geography: an examination of geography from Antiquity to the 1950s, with a special focus on human/environment relation; Geography 1950-1980: a critical review of the development of geography as a spatial science; Paradigms and Revolutions: an analysis of paradigm shifts in geography, introducing students to key debates in the philosophy of science; Positivism and its Critics: a detailed discussion of positivism, critical theory, humanistic geography, behavioral geography, and structuralism; New Trends and Ideas developing critical responses: structuration theory, realism, post-structuralism, post-modernism, feminism and actor-network theory. This text explores complex ideas in an intelligible and accessible style. Illustrated throughout with research examples and explanations in text boxes, questions for discussion at the end of each chapter and a concept glossary, this is the essential student companion to the discipline.
